PROFILE

Date of Birth: 2nd January 1991
Nationality: Kenyan
Languages: English, Kiswahili

EDUCATION

March – June 2015   Moringa School
I learnt the fundamentals of software development in native Android and Ruby on Rails in an Ubuntu Linux environment. I also learnt to use git for version control.

2010 – 2014   University of Nairobi
Bachelor of Commerce (Business Information Systems) - First Class Honours

EXPERIENCE

November 2016 - To date   Android Developer, REFUNITE
Role: Developing Relay, an offline first communication app for dense populations. I have been involved in building multiple iterations of the app through which I have gained vast knowledge in the scrum process, writing clean code, writing unit tests with JUnit and Mockito, the android MVP design pattern and the use of modern android libraries like RxJava2, and Dagger2. In this position I have also learnt how to craft a useful code review.

July 2015 – November 2016   Android Developer, Caytree Partners
Role: Developing the Caytree Financial mobile app on Native android. It is an invoicing, payments and lending application. I rewrote the first iteration of the app that was done in Xamarin to Native Android in order to achieve greater stability and take advantage of libraries like Retrofit, ORMs, up to date tooling, SDKs and a wider support community.

April '14 – March 2015   Content Associate, OgilvyOne Africa
Role: Managing website content on Airtel websites across nine African countries.

SKILLS

Mobile: Native Android (Java), Reactive programming using RxJava2, Dagger2 Dependency Injection, Model View Presenter pattern.
Web: Ruby on Rails, HTML5, CSS3, JQuery. I am currently learning how to build RESTful web APIs in Python on the Flask framework.
Databases: MySQL, PostgreSQL, SQLite
